its root and hypocotyl — the bulbous stem below the leafy growth — have for centuries been part of the diet and culture of people in the region.

the 1:1000 epi concentration is very very very concentrated.

Toshi Arai comes eighth and wins group N, despite being attacked by another drop bear.

Considering that L arginines tatse is repulsive, supplements in fluid kind would need some way to cover over it’s preference.

So I’m curious enough to ask the rest of you to hear...

Sensation-seeking may even be related to where you live, through interactions with neighbors; or, in the case of, say, New York City, through self-selection.

Which means it’s time to hang it up.

Once you have a prescription from a Spanish state doctor, you can take it to any pharmacy (farmacia) in Spain.
